

iPhone/iPod Touch Retail Form

FAX: 866-431-4138

Email: support@merchantfocus.com

By submitting this form, you are requesting Merchant Focus to **1)** add a retail rate tier of 1.74% for swiped transactions on your iPhone or iPod Touch with the use of the Card Reader attachment (sold separately) and **2)** the setup of an additional retail Authorize.Net gateway at the monthly cost of \$5.00.

This request can only be made by the **authorized signer** on this merchant account.

Merchant DBA: _____

Merchant ID (MID): _____

Authorized Signer: _____

Signer Title: _____

Phone Number: _____

Email Address: _____

While it is not required, it is recommended that you consider the use of a manual imprinter in situations where you are unable to swipe the credit card through the card reader and must key enter the transaction. With these changes to your account, in the event that a chargeback would occur on a keyed transaction through your iPhone or retail Authorize.Net gateway, it is unlikely that you would be able to dispute a chargeback against your company if a manual imprint of the card is not taken. Please refer to the Terms and Conditions of your merchant agreement for further information.

By signing below, I agree that Merchant Focus will setup the above requests on my merchant account for use with the iPhone card reader. I understand that this will incur an additional cost to my company/organization which will be billed to me by Merchant Focus and Authorize.Net.
